

Heater Control Box

Do you bake kosher products? Our "Eternal Flame" heater glows red continuously so there is no need to call in Maintenance personnel to light the oven during an after hours inspection. The package consists of a 5/8" x 10", 250W, 120VAC hot tip cartridge heater which is wired to a stainless steel termination/control box 8" x 6" x 6" with padlock. Locking key assures your customer that no tampering has occurred. Red LED is visible through the panel door to indicate that current is flowing to heater.

To install - mount heater through oven wall, cut cable entry holes in box, wire 120 VAC power to terminal strip heater connection and you're done. Low watt density, long life heater glows continuously (no controls) ***Optional 5/8" x 1/2" NPT compression fitting available for easy heater mounting.
