

# W.H. Cooke Times

Vol. 9, No.1 Spring 2022 Hanover, PA  
Free

Manufacturer of thermocouples, RTD's, and thermistors and distributor of instrumentation and controls for temperature, pressure, level, flow, pH, RH, flame and gas detection and heaters for almost any application. We also carry chart recorders and chart paper and pens as well as paperless recorders, data loggers, pumps, valves, and motors, and industrial oils, solvents, lubricants and PPE. # Quarter in Review

## **LEAD TIMES!! Wow! They are getting out there!**

The good news is that W. H. Cooke & Co. is still working on 1 week to ship lead time on most thermocouples and RTD's. If we need to bring in some exotic materials or special protection tubes that lead time could be extended. We are also stocking temperature controls and more parts than ever as we continue to try to stay ahead of supply chain issues. Please try us for price and lead time on all of your parts needs. Thanks, and let's bring on Spring!

Best Regards,  
Wayne H. Cooke

# Boiler & HVAC Parts

W. H. Cooke & Co. manufactures magnetic thermocouples and can customize to your specific needs. If you need to measure surface temperature and cannot have a probe inserted into the process, a magnetic thermocouple might be the solution you need.

Page 5

## Cables, Extensions, and Harnesses

Have you ever ordered a sensor or assembly and upon receipt realized you wish you would have thought about ordering a mating cable, or an extension to run back to your PLC or other reading device? Regret no more, because W. H. Cooke can manufacture custom cable assemblies to your specification. That's right, be it a temperature extension cable, a mating cable for your proximity sensor with M-12 connector, a double ended Cat 5 Network cable, or even some cable of your own design, we can make it for you.

Whether you need just one extension cable for a rebuild or replacement, or you need hundreds for a whole new installation, we can help. We are always available to quote each application specific to your requirements. If you should have a sketch or detailed drawing, please send it to [team@whcooke.com](mailto:team@whcooke.com). Or if this is part of a new or ongoing project, don't hesitate to call us to discuss options. We may even have some options that you didn't know were available.

If cables and extensions are new to you, the general specifics we would need are of course the overall length, any cable specs or requirements that need met, temp rating, environment for use, connections on either end, and pinout for connectors. All this can usually be accomplished over the course of a short discussion.

Lastly, we can label you cable or even serialize individual cables, or entire harness assemblies. This can be especially helpful when working with large arrays, or even when keeping track of how many you may have in the field. You may just want a simple label with your name and part number on a cable that ships to your customer...we can do that too.

-Dan Feeser

## Spring Punnies!

**How do you make a waterbed bouncer?**  
Fill it with spring water.

**How did the bee brush his hair?**  
With a honeycomb.

**Why couldn't the flower ride a bike?**  
It lost its petals.

**Does February like March?**  
No, but April May.

**Why did the bird go to the hospital?**

It needed tweet-ment!

**Can bees fly in the rain?**

Not without their yellow jackets!

**Why was the baby strawberry sad?**

His mom was in a jam!
